Drugs are bad, Intake is good.
They should make this for arcades.
Spaghetti.. Great time waster, test your reflexes, feel like a badass, etc etc.

If the song in the gameplay trailer doesn't thrill you, there are others you unlock through the course of the game. There is a progression of upgrades, so you aren't dropped right in the from the start. You choose which you want to unlock first and when to upgrade them. As you get better at the game and more powerful upgrades you will go further and earn even more. You can drop in from a later checkpoint if you're looking for a shorter hop in\out kind of play, or start from the beginning every time and try to build a massive combo for big points.

TL;DR - Drugs are bad, game is good. NEON
PILLS
MUSIC THAT MAKES YOU FEEL LIKE A HIGH SCHOOL CHEERLEADER ON ADDERALL\u2014
NO LONGER MUST YOU GO TO A HORRIBLE RAVE FOR THESE THINGS.

Intake is an arcade game you'd find in The Sprawl, played by razorgirls and sweet cyperspace cowboys.

8/10, would overdose again.. Do you like to click? Do you like to smash that click button till your finger bleeds? This is the game for you! PS... You might want to smash the keyboard to!. It's fast, it's cool, it's addictive.. Neon colors. Dubstep. Pills. Flashes. Bangs. Booms. Coin-up look and feel. Excellent game.

Intake it's a rare gem, every single part of it in harmony with the rest, making this game an instant thumbs up. Gameplay is excellent, either you use keyboard or mouse: simple controls for quick, non-stop action. Graphics are sharp and bright colored and the interface is, for a lack of a better word in my limited vocabulary, classy. Sound effects are great and contribute to generate a really immersive experience.

And the game's soundtrack it's glorious, making the game unique and memorable. The coin-up theme it's another plus, even more if you used to play arcade machines with the level of addictiveness and replayability that this game has. Let me tell it on more concrete terms: this game it's a good purchase for ten bucks (even if you can get it for one).

That's high praise coming from me. Well done Cipher Prime, I hope you keep making awesome games in the future.. DRUGS THE VIDEO GAME!. Addicted to drugs or classic dubstep?
want a hyped out game that pushes the boundaries of your mouse?
Then this game is what you seek, its one of those games were you would sit down for 10 minutes and then leave it again. But those 10 minutes are going to bring you far! One thing i recommend is taking breaks often as its fast phased, intense, and requires a steady yet fast hand aswell as eyes.

Its challenging and its a lovely feature to add milestones on the waves such as 0-25-50-100 which means if you ever should get past level 25 you wouldnt have to work all the way back up, you can go to the settings and make it start at level 25 :)

The lack of music tracks is what brings it a little down in grade as you only got 1 song and 2 unlockable songs, which are about 30 secs long and then repeated :/ I find my self just slapping one of my own songs on in a browser or media player and play the game W\o music ^^

The tricky parts comes in evading flashbangs (placebo) and changing colors so your crosshair's color matches the pill you want to bring to an end, as if a yellow pill falls you want to right click or press spacebar to change to the yellow color. There is 2 colors changing each round, and you can unlock a harder difficulty by unlocking 3 colors or more.

The game is enjoyable, playable and most of all replayable :)! but as i said, the major thing that drags it down is the lack of music :(

8/10!

I wasn't sure about this game, but now I'm absolutely in love. It's almost pure gameplay, and at that the game excels. It's a lot of fun and has surprising variety thanks to a system of unlocks. It's also just challenging enough, which gives it nigh-infinite replayability. Definitely one of the hidden gems.. Fastest shooter ever made and still gunning for ya!. This game is awesome. You will love it, but expect some small bugs in the game play, and some achievements are either extremely hard or impossible to get, either due to the design of the game0, or due to a bug.

Update: The Cutting it Close achievement cannot be obtained.. This game great in it's simplicity. Addciting with great graphics and music. Oh and it's pretty darm cheap!. In case your dealer is busy, this game should take your mind off drugs until he calls back.. "if your looking for a game about popping pills, then you probably might need help, but this game is really fun arcade score attack and I'd advise considering this game."

This game is intense, no doubt about it. Its a simple mechanic, of two coloured pills each level. You can switch colours between the two and match to maximise score. Although im not a big fan of dubstep, the music is still impressive and well done, I do like the way the colours compliment eachother and the way the levels ramp up makes the game really hard. The powerups are fun and interesting and overall the game is impressive.

A game is nothing without its faults, It has a very strange screen resoulution, screaming that this is a phone game aswell, and personally i think the powerups came in rediculously frequently. I also think the bright colours may or may not hurt peoples eyes.

In conclusion, if your looking for a game about popping pills, then you probably might need help, but this game is really fun arcade score attack and I'd advise considering this game.

7V10. Before you start play this game,ask your doctor first.

Side effect here:

You can't stop yourself keep play again and again
